

HMS1

Description

The Plus Audio HMS1 Headworn Microphone System is a premium single-ear headset microphone designed for professional use, featuring a durable, highly flexible boom that ensures durability and precise positioning. The 2.5mm omnidirectional condenser capsule, made in Denmark, provides exceptional audio clarity across a 20Hz-20kHz frequency range. With a comfortable and adjustable ear hook, the HMS1 offers both versatility and a secure fit. Compatible with Shure and Sennheiser systems, making it perfect for live performances, broadcasts, presentations, and more.

Meta Fields

Features:

- **Highly Flexible Boom:** Features an almost unbreakable, highly flexible boom for durable performance and precise microphone positioning.
- **Premium Microphone Capsule:** Equipped with a 2.5mm Danish-made omnidirectional condenser capsule for superior audio clarity and sensitivity.
- **Versatile Design:** An adjustable ear hook provides a secure, comfortable fit for single-ear configurations.
- **Wide Compatibility:** Includes adapter cables for Shure and Sennheiser systems, ensuring easy integration with existing setups.
- **Complete Accessory Kit:** Comes with two windscreens, and a protective carry case for added convenience and protection.

Specification:

Element Back electret condenser

Polar Pattern Omnidirectional Frequency Response 20Hz - 20kHz

Sensitivity -35 dBV/Pa @ 1kHz ±3dB

Output Impedance $2k\Omega \pm 30\%$

Maximum SPL 140dB Self-Noise 30 dB(A) Dynamic Range 110dB

Operating Voltage 1.5 – 12V DC

Cable Ø1.4mm x 1.2m

Weight 0.09 oz / 2.5g

Dimensions Ø2.5mm

Included Adapter Cables Sennheiser and Shure

Accessories 2 windscreens plus a protective carry case
