MMS1 System Bundle

Description

Plus Audio MMS1 System Bundle

The Plus Audio MMS1 system bundle includes a condenser clip microphone system for reinforcing and recording a variety of different musical instruments including those used in both contemporary and classic music genres. Its lobar polar pattern ensures that the sound of the respective instrument is picked up with minimal leakage and enhanced gain before feedback. it is suitable for use with wireless systems from both Sennheiser and Shure. As a condenser microphone, the MMS1 microphone requires phantom power, so the scope of delivery includes an XLR phantom adapter that can also be used to connect the mic to a mixing desk, and the integrated 2m cable additionally allows a high degree of freedom. The included mounting hardware is suitable for a wide range of instruments and does not cause any damage to the instrument it’s mounted to, allowing ideal microphone placement which is crucial to a high quality sound outcome.

The Plus Audio MMS1 System Microphone
Condenser Clip Microphone
